The following is an Examiner's statement of reasons for allowance:

Claims 1, 10 and 21 are allowable because the prior art of record or that encountered in searching for the invention, fails to disclose or suggest a database integration management for integrating items of material-object information having the same material-object identification code with each other among a material-object information database in each business category to generate integrated material-object information, associating the material-object identification code with the integrated material-object information identified by the material-object identification code and storing the material-object identification code and the integrated material-object information in an integrated database, as claimed in addition to the other claim provisions.

Claims 2-9 depend from claim 1, and are therefore allowable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to illustrate the state of art with respect to database integration systems:
